21 February 2024

COPE WELCOMES THE ELECTION'S DATE AND IS CONFIDENT OF SIGNIFICANTLY IMPROVED PERFORMANCE

For immediate release

Congress of the People welcomes the announcement of 29 May 2024 as the date for the much-anticipated general elections for our country.

The party has been busy preparing to undertake a successful campaign to improve its performance significantly at the polls. We are confident that we will dramatically turn around the unfortunate and externally induced decline we experienced in the past.

Our ideological stance and policy positions resonate with the significant silent majority in all communities, and we are a credible alternative political home for all.

The hostile political environment obtained in past campaigns, occasioned by exogenous political machinations by the ruling party of corruption, has been dispersed and diverted elsewhere. Their hegemonic power has been eroded significantly.

Our resilience is a motivational factor, and we will conduct a strong and positive campaign.

COPE calls on the people to vote in large numbers and determine the course of their lives and destiny. Only the power of the vote can hold the leaders and the government accountable. We call on them to give us a stronger mandate to save our country from the destruction caused by years of corruption, bad governance, and mismanagement of the nation's affairs. We believe that we have a credible plan to save our country.
